① Comments

In category Page there is only small amount of space so, we can't add more product in it need to expand category Page

In this we can add Personalized Recommendation for improving user experience to buy more products.

we can use Advanced Searching and filtering system using AI

Then we can add subscription system to keep customer's consistence in same Grocery app.

Review-2

(1) Create Home page for login (or) sign up.

(2) In categories we can give page like

- Vegetable
- chocolate
- cosmetics
- Snackes

* after selecting that option will show the types.

(3) Add Quantity of the item.

we may add some pages:

(4) * Order cancelation

* Money Refunding within few days

* Contacting details

order Cancellation

* Select Item to Cancel

+ Money refund

Add to cart

Item 1 - 1 +

Item 2 - 1 +
